Concurrent And Distributed Computing In Java - [FREE] **CONCURRENT AND DISTRIBUTED COMPUTING IN JAVA** [EPUB] [PDF] Concurrent computing is a form of computing in which several computations are executed during overlapping time periods—concurrently—instead of sequentially (one completing before the next starts). This is a property of a system—this may be an individual program, a computer, or a network—and there is a separate execution point or "thread of control" for each computation ("process"). - Wed, 17 Apr 2019 02:41:00 GMT **Distributed computing - Wikipedia (PDF)**
