A regularization approach is applied to the backwards heat equation, and we obtain a problem of incomplete data, for which the method of Nakoulima et al. [2] is developed. **Low-regret control of singular distributed systems: The ...** Under an Elsevier user license. open archive. We use the low-regret notion of Lions [1] for the control of a class of singular distributed systems: the ill-posed problems. A regularization approach is applied to the backwards heat equation, and we obtain a problem of incomplete data, for which the method of Nakoulima et al. [2] is developed. **Control of singular distributed parabolic systems with ...** Abstract. We present the statement of control problems for singular distributed parabolic systems with discontinuous nonlinearities. Sufficient conditions for the existence of the optimal "control-state" pair are established under the assumption that the set of admissible "control-state" pairs is nonempty. **(PDF) Control of Distributed Systems: Tutorial and Overview** PDF | Distributed systems consist of an interconnection of two or more subsystems. Control of such systems is structured by two or more controllers, each receiving an observation stream from a ...
